

# Anti - PKC-βII

# Rabbit clonal antibody

## CAT#

DB 007-0.05 (50 μl) DB 007-0.1 (100 μl)

## PRODUCT INFORMATION

Clone number: N11-S

**Uniprot:** Human: P05771-2: Mouse: P68404-2: Rat: P68403-2

Product description: Rabbit anti-PKC-βII clonal IgGs

Basic information: Major clone of rabbit immunoglobulin corresponding to

immunogenic peptide

Immunogen: Peptide derived from C-terminal sequence of human

PKC-βII. Antibody recognizes the epitope located

between Asn663 - Lys 672.

Species reactivity: Human, mouse, rat - tested

Buffer: 20 mM Tris-HCl, pH 8.0 Stabilizer: 10 mg/ml BSA Preservative: 0.05% Sodium Azide

Storage: 10 µl aliquots at -20°C
Handling: Avoid repeated freezing and thawing
Expiration: 24 months from the shipping date

Applications: Western blot, Immunoprecipitation, ELISA,

Immunocytochemistry (ICC)

Dilution range: Western blotting – 1:10,000

ELISA – 1:20,000-1:100,000

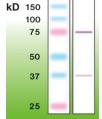

Immunoprecipitation - to be tested by user

# WESTERN BLOT (WB) PROTOCOL - INSTRUCTION MANUAL

#### Western immunoblotting solutions:

- Wash buffer: 1x Tris Buffered Saline (TBS); 0.2% Triton X-100
- Blocking buffer: 1xTBS; 0.2% Triton X-100; 5% nonfat dry milk

For western blots, incubate the membrane with antibody diluted in blocking buffer for 2 hours at room temperature.

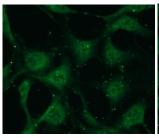

∠— PKC-βII

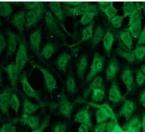

Anti - PKC-βII (DB 007).

Western blot of PKC- $\beta$ II in mouse brain crude lysate (50  $\mu$ g of protein loaded).

## IMMUNOCYTOCHEMISTRY (ICC) PROTOCOL - INSTRUCTION MANUAL

- Coat coverslips with 1% gelatin-coating solution for 2 hours at room temperature (RT); rinse with distilled water, and let to dry overnight. Before plating the cells, wash the coated coverslips briefly with PBS.
- 2. Fix the cells with 4% paraformaldehyde solution (in PBS, pH 7.2), for 15 min at RT.
- Wash 2 x 3 min with PBS.
- Permeabilize the cells with 0.1% Triton X-100 solution (in PBS, pH 7.2) for 5 min on ice.
- 5. Wash 2 x 3 min with PBS.
- 6. Incubate the cells in blocking buffer (0.3M glycine in PBS, 2% BSA) for 30 min at RT.
- Incubate the cells with primary antibody: anti-PKC-βII clonal antibody at the dilution of 1:100 - 1:400 in antibody dilution buffer (PBS, 1% BSA) for 1 hour at RT in humid chamber
- 8. Wash 2 x 3 min with PBS.
- Apply the secondary antibody (in this case, the goat anti-rabbit IgG-FITC from Jackson Immunoresearch, cat. # 111-095-003, was used at 1:300 in antibody dilution buffer, and cells were incubated for 1 hour at RT in dark).
- 10. Wash 3 x 3 min with PBS.
- 11. Rinse once with distilled water.
- 12. Mount the slide for observation, with a drop of anti-fade mounting medium.

Revision date: 17.01.2017

Representative pictures of PKC-βII expression in HEK293 cells, visualized with clonal rabbit anti-PKC-βII monospecific antibody. Primary antibody dilution - 1:200.

# **PRECAUTIONS**

- 1. Intended for professional In Vitro Diagnostic use in laboratories.
- Do not use after expiration date stamped on vial label.
- 3. Avoid contamination of the reagent.
- Any discrepancies in the recommended procedures stated in the working protocol may affect the final results.
- The reagent contains sodium azide (NaN<sub>3</sub>) which is highly toxic in higher concentrations. The concentration in the reagent (0.05%) is not considered as hazardous.
- 6. Disposal of waste material must be conducted in accordance with local regulations.
- Wear appropriate Personal Protective Equipment to avoid contact with eyes and skin.
